

SAFETY ALERT

TITLE: INCLEMENT WEATHER ROAD and INFIELD CONDITIONS

Number: 46

Issued: 15/07/2021

Background

To All Contractors,

A gentle reminder, we are and have experienced significant inclement weather over the past month.

Road conditions both infield and on public access roads can deteriorate very quickly creating hazards for all road users.

Likewise, the heavy rains may also create environmental issues in operational areas.

As our industry networks are extensive, please ensure it is communicated to all staff to proactively assist in maintaining road conditions during these wet periods, inclusive off:

- driving to road conditions.
- report hazards.
- trucks to utilize central tyre inflation (CTI) on unsealed roads.
- reduce speed.
- minimise traffic volumes where practicable.
- consider alternative routes and raise with FPC officers.
- consider infield extraction tracks for erosion.
- where possible, assist in the management of pooling water.

Everyone's assistance is appreciated so we can keep operations open for as long as possible during these wet periods.
